# Simplifying Application Integration Across the Cloud

Technology has evolved in terms of complexity and usage in the business world. But this growth has raised questions and concerns on how to manage the myriad of applications. The exponential growth in data and corresponding communications between various applications is swiftly growing beyond anyone's ability to manually process. With an average organization having 113 applications deployed, there is a high demand for cross-application integration, communication and automation.

QuickLaunch EiPaaS leverages robust integration capabilities letting you connect to a wide ecosystem of apps. It allows you to orchestrate and maintain your technology stack by supporting ever-growing collection of essential applications and provides complete system-to-system integrations across different solutions.

The Indispensable Capabilities of QuickLaunch EiPaaS

QuickLaunch EiPaaS is crafted to deliver best-in-class user experience by increasing efficiency, eliminating data and operational silos and reducing dependencies on legacy integrations that are outdated or no longer comply with modern IT infrastructure.

Boost productivity of your staff, increase data access and transparency by integrating all your essential applications on a single platform, thereby creating a seamless and secure digital environment. Modernize your IT architecture, unify all your solutions and monitor all your integrations on a single platform.

Benefits

➤ Simplify user experience with easy-to-use drag and drop interface

➤ Integrate all of your applications in one stable environment

➤ Boost staff productivity by eliminating apps and data silos

➤ Leverage configurable APIs to connect and integrate multiple applications and solutions

➤ Monitor all your application integrations under one single platform

QuickLaunch EiPaaS Features

▶ **Workflow Orchestration Engine**

Data processing for an organization has multiple dependencies and are chained to one another. QuickLaunch EiPaaS automates this workflow chain and executes each data flow task in a specific sequence, processing the entire dependency as a single unit.

▶ **Real-Time Integration**

The number of SaaS applications an organization uses is increasing. EiPaaS meets this increasing demand for data synchronization and processing across multitudes of enterprise applications.

▶ **Mitigate IT Burden**

As EiPaaS is accessible for non-IT professionals, the IT burden of managing organization's integrations is mitigated for IT department. This helps them focus on tasks and issues that can't be automated or outsourced.

▶ **Highly Scalable**

QuickLaunch EiPaaS offers multifaceted integration capabilities, even the most complex integrations are possible. When you start migrating apps, you can easily sync all contact data to the right places. So, you don't have to worry about manual import/export.
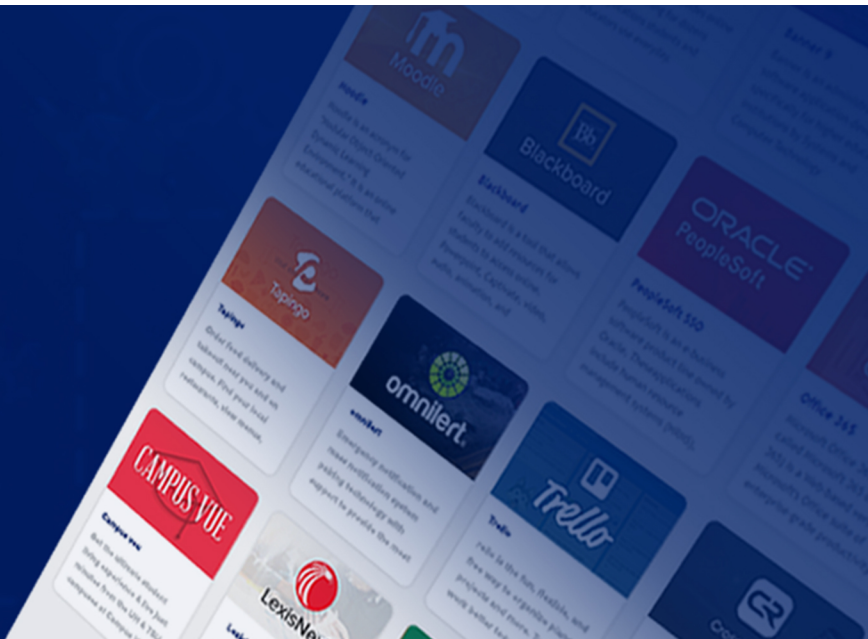

▶ **Centralized Interface**

Initiate, deploy and maintain integration of enterprise applications with QuickLaunch EiPaaS. Users can manage all integrations from an intuitive dashboard using a single login.

▶ **Customized API Management**

Our EiPaaS solution facilitates for the full deployment of APIs from one single platform with provisions for customizability and scalability, if needed, as well as incorporates business transition from EDI to API systems.

Build Your First Integration in Minutes

About Quicklaunch

QuickLaunch is the only AI-first identity and integration platform-as-a-service platform (IDaaS and iPaaS) that transforms how cloud-savvy institutions and companies manage human and device authentication, authorization, access control and integration. QuickLaunch leverages AI to autodetect threats and step up authentication. More than 500 institutions and companies such as Jenzabar, Unifyed, OculusIT, New Mexico State University, Colorado Community College System, BlackBeltHelp trust QuickLaunch to protect and manage over 2,000,000 identities and integration to over 3,000 applications such as Salesforce, Adobe Creative Cloud, Box, Canvas, Blackboard, G Suite and Office 365.
