

Beloit College

Centralizing Authentication
Today, Automating Identity for
Tomorrow

ABOUT BELOIT COLLEGE

Location: Beloit, Wisconsin

Beloit College is a private liberal arts college in Beloit, Wisconsin, known for its interdisciplinary and globally focused education. The college supports a diverse student and faculty community through a combination of traditional academic programs and digital learning services.

- ~1,200 Student FTE
- ~250 Faculty & Staff
- Residential liberal arts institution

Core Systems

24+ service providers integrated with QuickLaunch SSO

CHALLENGES:

Beloit College needed a centralized identity platform to simplify access across academic and administrative applications while providing secure authentication and self-service identity management. With identity data centered around Jenzabar and Active Directory, the college also identified an opportunity to automate the complete user lifecycle and eliminate manual provisioning processes.

FTE: ~1,200
Industry: Higher Education

SOLUTIONS:

Beloit College leverages **QuickLaunch SSO, MFA, SSPR, Account Activation, and Identity Lifecycle Management (ILM)**.

QuickLaunch now:

- Provides **SSO across 24+ applications**, including Jenzabar, Moodle, Google Workspace, Jamf, SchoolDude, Rave, and other campus services.
- Provides centralized MFA protection across institutional applications.
- Enables approximately **300 password resets every month** through SSPR.
- Provides self-service Account Activation to streamline initial user onboarding.
- Has been contracted to implement **full JML automation**, connecting **Jenzabar On-Premises with Active Directory** to automate Joiner, Mover, and Leaver workflows.

OUTCOMES:

- Unified SSO across **24+ enterprise applications**.
- Approximately **300 monthly password resets** handled through self-service.
- Centralized authentication and MFA across the college's digital ecosystem.
- Reduced manual identity administration through Account Activation.
- Foundation established for **end-to-end automated identity lifecycle management**.

CUSTOMER VALUE:

Moving from access management to complete identity lifecycle automation. QuickLaunch provides Beloit with a single platform for secure application access today while establishing the foundation to automate how identities are created, updated, and removed across the institution.

FUTURE SCOPE:

Full JML Identity Automation

The next phase of Beloit's QuickLaunch journey is focused on full **Joiner-Mover-Leaver automation**.

QuickLaunch will:

- Implement automated identity lifecycle workflows between **Jenzabar On-Premises and Active Directory**.
- Automate account creation, updates, and deprovisioning based on authoritative identity data.
- Reduce manual IT intervention throughout the employee and student lifecycle.
- Extend identity automation to additional systems and applications as the college's requirements evolve.
